

5 things I believed about the COVID-19 vaccine VS what truly happened...

*brought to you by the over-enthusiastic MO who got vaccinated in JAN 😊

MYTH

REALITY

The early bird always gets the first vaccine!

The early bird also gets to sit with all the professors/senior senior consultants who got the 1st slot...

It would put me out of work for a few days

It did not put me out of work at all, much to my own chagrin.

The vaccine would be really painful 😞

The jab was barely felt to be honest.

The swabs for Rostered Routine Testing would not hurt at all

They actually really did hurt.

After the vaccine, I would gain SUPER POWERS and SUPER IMMUNITY against COVID

My superpowers have yet to show up. As for that immunity, with the community getting vaccinated — we are slowly but surely heading towards Immunity 😊

I got my shot
get vaccinated

Another comic by Ada Nya, this time in colour 😊
