

Singapore Medical Association
For Doctors, For Patients

Improving Our Care of Patients with Cardio-Metabolic Disorders

Date: **10 September 2022, Saturday**

Time: **1 pm to 5 pm**

Venue: **Camden Medical Centre**

No. of CME Points: **2**
(pending Singapore Medical Council's approval)

In Singapore, we are witnessing patients who live longer but have to cope with increasing amounts of comorbidities. Primary care practitioners will continue to play a critical role in the healthcare of Singaporeans as we add life to the years of our patients and their loved ones.

In our first in-person SMA GP symposium since the COVID-19 pandemic, we look to bring together medical practitioners to exchange cardiovascular knowledge and passion to empower each other. In this event, we will learn to harness modern techniques to navigate these medical challenges and bolster our patients on their path to stay healthy via lifestyle interventions.

We look forward to meeting you in person!

To register, please scan QR code or visit our website.
